Education

Westminster University | Salt Lake City, UT.....Exp. May 2027

B.S. Business Computer Information Systems, Minor in Applied Mathematics

Major GPA: 3.50 | **Minor GPA:** 3.75

- **Relevant Courses:** Algorithms | Data Structures | Machine Learning | Software Engineering | Databases | Data Science with Python | Advanced Calculus | Discrete Mathematics
- **Honors & Awards:** Dean's Scholarship Recipient | ACT: Composite 32 (Math 35, Science 36)

Personal Projects

- **MorningAfter — Android Digital Wellbeing Application** (*Independent Project, 2026*)
 - Developed a native Android app that detects morning wake events from Samsung Health sleep data and automatically restricts selected applications.
 - Built Accessibility Service-based blocking with background monitoring and persistent state management to enforce configurable restrictions and prevent bypass methods.
 - Implemented configurable lock durations, app selection, allowlists, monitoring intervals, and event logging.
- **Automated Event Extraction & Scheduling Engine** (*Independent Project, 2024–2025*)
 - Built an automated pipeline that converts unstructured emails into structured Google Calendar events using Gemini.
 - Integrated Gmail, Google Calendar, and Pushbullet APIs into an end-to-end workflow for email ingestion, event extraction, scheduling, and notifications.
 - Deployed an email-processing workflow on a one-minute polling cycle for ~1 year, using hash-based deduplication to prevent duplicate event creation.
- **Frognition — Educational Math Web Application** (*Team Software Engineering Project, 2025*)
 - Collaborated in a 4-person Agile team to develop an educational math web application using React and Django REST Framework.
 - Developed core gameplay systems while using Git-based version control and sprint-based workflows for team integration.
 - Integrated frontend components with REST API endpoints to support application state and gameplay interactions.

Skills

- **Technical:** Python, Java, JavaScript, SQL, Git, REST APIs, Android, React, Django, Google Cloud
- **Concepts:** Object-Oriented Programming, Data Structures & Algorithms, Machine Learning
- **Languages:** English (Native), Spanish (Conversational)

Experience

Chipotle, Certified Trainer | Holladay, UT.....Oct 2024–Present

- Trained and onboarded 10+ employees across multiple roles through hands-on instruction.
- Work across front- and back-of-house roles in a high-volume environment.

Jimmy John's, Manager | Murray, UT.....Sep 2021–Oct 2024

- Led day and night restaurant operations, managing teams of up to 10 employees.
- Directed task prioritization and resolved operational issues in a fast-paced environment.
